District Advisory Committee (DAC) Notes

March 14, 2019

Introductions, **Review of Group Norms & District Mission**	Introduction of county SELPA Director and Program Specialist, who attended and participated in the meeting. The DAC reviewed the district mission and group norms.
Session Outcomes	1. Connect LCAP and Dashboard data to site data 2. Evaluate progress and implementation of SPSA (Single Plan for Student Achievement) Strategies
Connecting the Data	Brief presentation illustrating the connection of data from daily (formative) types of data/assessments to annual or large scale (summative) assessments/data.
SPSA Strategy Evaluation	Explanation and modeling of how to use the SPSA strategy evaluation process included information on effect size of instructional strategies and circle of influence as it relates to barriers for implementation or impact of a strategy. Modeling of the process and how to use the SPSA strategy evaluation template was provided prior to site teams working on their SPSA strategies. Teams were encouraged to attend to subgroups such as students with disabilities since this group rated red on the dashboard and qualified the district for differentiated assistance.
Work Time for Site Teams to Evaluate SPSA Strategies	Each site team worked collaboratively on evaluating strategies found in their site's SPSA using data and the SPSA Strategy template. Teams identified the strategy effect size, impact, and barriers. They re-evaluated the strategy to determine any revisions/shifts needed to the strategy in order to achieve the goals.
Team Sharing	Teams shared one SPSA strategy the team evaluated.
Closing:	UTeams were reminded of the upcoming meeting on 4/11/19.
